

SOLARVEST HOLDINGS SDN BHD

PROJECT TITLE:

Streamlined Workflow Automation for the Quantity Survey Department Using Microsoft Power Platform: Power Apps, Power Automate, and Power BI Integration.

PROJECT OVERVIEW:

The Quantity Survey (QS) Department at Solarvest Holdings Sdn Bhd aims to enhance operational efficiency by streamlining and automating key workflows. The initiative focuses on transforming traditionally manual processes into a seamless, automated system to reduce errors, save time, and improve overall productivity.

Key workflows targeted for improvement include:

1. **Quotation Sourcing and Comparison:** Simplifying the procurement process by automating the collection, evaluation, and comparison of vendor quotations.
2. **Work Order Preparation and Issuance:** Creating a streamlined approach for requesting and distributing work orders to ensure timely execution.
3. **Invoice Management:** Introducing a centralized and systematic solution for managing vendor invoices, enabling faster approvals and enhanced tracking to replace current email-based processes.

Remarks: The person should be equipped with knowledge in API connection as well.
